

T-Series: Universal Barcode Readers

Unmatched API Integrations

Credit Card In/Out Capable

360 Degree Cloud Controlled

Zero Moving Parts

Simplified Setup/Infrastructure

Fabricated & Built in the USA

Parkonect's **plug-and-play** universal barcode readers instantly bring your indoor or outdoor facility to the cloud, adding **online sales** and other **innovative parking technology** and empowering you to make the most intelligent decisions to drive additional revenue to your asset.

Deployed alone or alongside legacy equipment, our powerful IoT devices provide you with a cost effective approach to digitize your parking operations while providing your parkers multiple tech-forward options to access your facility, including Text2Enter and Parking Cashier modules.

These readers encompass the full functionality of the **Gen2 full system** with the exception of a ticket dispenser. That means **instant integrations** with every major online seller, **GPS-enabled iPhone/Android monthly passes**, **web-based validations & ParkingPass Generator program for guests**, **hotel self parking**, **3rd party valet tracking** and, of course, all the **real-time logs**, counts and controls from our cloud-based dashboard, accessible anytime, anywhere through any internet-connected device.
